

## Echo Nightstands

Set exactly the right tone with the eclectic elegance of the **Echo nightstands**. Embracing a marriage of styles, the pair is a harmonious union of materials, textures, and forms that resonate of the Japonise and Art Nouveau movements.

Each table has a square and rectangular drawer, fronted and softened with a curling, polished bronze pull cast from variegated filbert branches. Also repeated in bronze, the curvaceous legs are cast from bittersweet vines. In different lengths, they retain the bark's rough-hewn texture and support the hand-lacquered case, painstakingly polished to a reflective sheen and high-gloss finish.

“The juxtaposition actually enhances the essential beauty of each element,” explains designer Laura Spector.

Exquisitely handcrafted, the nightstands are mirror images of each other, further reflecting Spector's study in contrasts. Shown in a soothing Jade; custom colors available.
