Sendak Lamp

Laura Spector's Sendak Lamp is perfect for anyone who has ever made mischief of one kind or another. Inspired by **Maurice Sendak's** classic, ***Where The Wild Things Are***, these birch tree lamps will transform any room into a forest

Made from molds taken from silver birch trees, then cast in aluminum with a rough hewn finish and irregular edges, these lamps have a strong sculptural profile that would work in both traditional and modern rooms.

The lamps are available in table and floor versions (28" h and 68" respectively,) while the 20" wall sconce comes mounted on a blackened steel plate.
